NHS Supply  
Chain**

**NEW**

## Ultrasound Probe Cover & Gel Kit

When **precision** and **sterility** are important

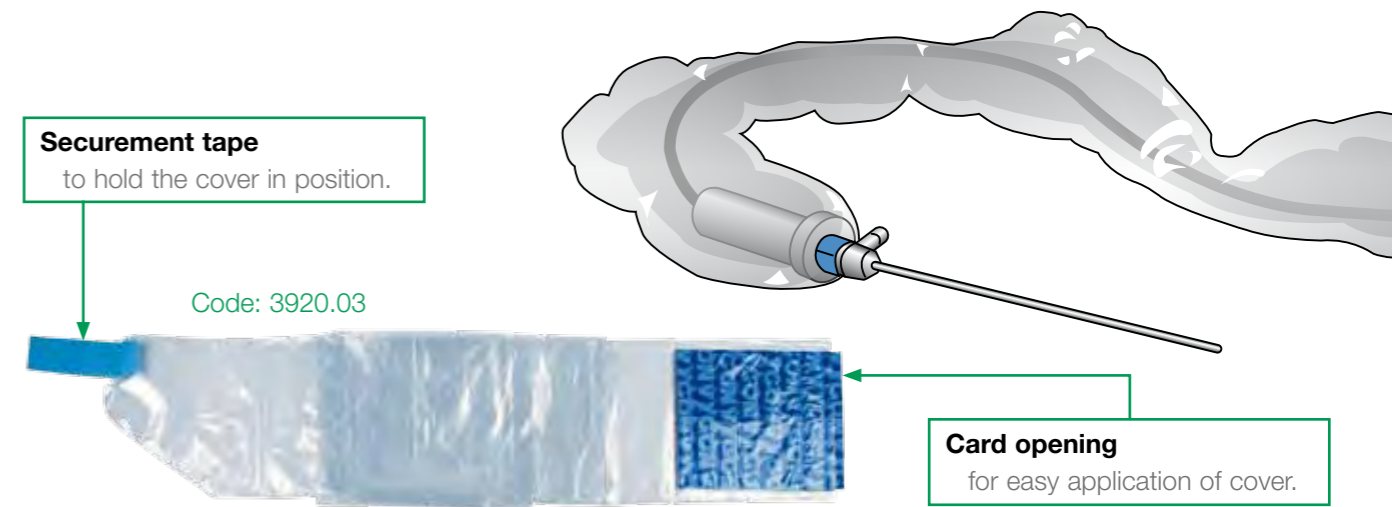

Many studies have recognised that cross-contamination is possible between patients during Ultrasound procedures, which may lead to nosocomial infections.<sup>(1)</sup> Because this potential for infection is now common knowledge, many hospital policies, standards and protocols now recommend the use of disposable Ultrasound equipment covers for each patient, accompanied by individual sterile gel sachets.

(1) Christy Ridge, BS, BSRT. Sonographers and the Fight Against Nosocomial Infections: How Are We Doing? JDMS 21:7-11 January/February 2005.
